

Aryan Sharma

SKILLS

ML & AI: Scikit-learn, XGBoost, LightGBM, Random Forest, SVM, Naive Bayes, K-Means, DBSCAN

Deep Learning:- TensorFlow, PyTorch, Keras, CNN, RNN, LSTM, Transformers, BERT

NLP & GenAI:- LangChain, RAG, LlamaIndex, Hugging Face, Prompt Engineering, Fine-tuning, OpenAI API

Data & Analytics:- Python, Pandas, NumPy, SQL, Power BI, Tableau, MS Excel, Matplotlib, Seaborn, Plotly

MLOps & DevOps:- MLflow, DVC, FastAPI/Flask, Docker, Kubernetes, GCP, CI/CD, Git, GitHub, Airflow

Databases:- MySQL, PostgreSQL, MongoDB, Pinecone, ChromaDB, FAISS (Vector DBs)

Programming:- Python, SQL, JavaScript, TypeScript, Bash

Project Portfolio

- *AI-Powered Responsible Collections Engine*
- *RAG Chatbot (LangChain + ChromaDB)*
- *ML Churn Prediction System*
- *Time Series Forecasting App*
- *NLP Sentiment Classifier*
- *Smart Library Management System*
- *Real-Time Anomaly Detection Dashboard*

Certification

- *GenAI Engineering Mastermind – Outskill*
- *Data Analytics Simulation – Tata Group (Forage)*
- *Data Analytics – Deloitte (Forage)*
- *JPMorganChase Software Engineering – JPMC (Forage)*
- *Certified Full Stack Developer – WhiteHat Jr*

ARTICLES

The Architecture of Vulnerability: A Contemplative Inquiry into LLM Prompt Injection and the Future of Semantic Security

OPEN TO

- ML / AI Engineer
- Data Scientist
- Generative AI Engineer
- MLOps Engineer
- AI Research Intern
- Data Analyst

PROFILE

AI/ML & Data Science specialist with hands-on experience in machine learning, NLP, deep learning, and MLOps. Completed virtual internships with Tata Group (GenAI Data Analytics, Nov 2025–Feb 2026) and Deloitte (Data Analytics Job Simulation, Feb 2026), focusing on EDA, predictive modeling, RAG pipelines, and agentic AI workflows. Proficient in Python, Scikit-learn, TensorFlow/PyTorch, LangChain, SQL, and data visualization. Eager to contribute to AI/ML-driven products and research-oriented roles.

ACHIEVEMENTS

- Built AI/ML projects using LangChain, RAG, and vector databases
- Completed multiple industry virtual internships from Tata, Deloitte, and JPMorgan
- Strong interest in Generative AI, MLOps, and AI Automation
- Active learner in Data Science and AI ecosystems

EXPERIENCE

Cyber Security Analyst Intern

Tata Consultancy Services

Feb 2026 - May 2026

- Engineered and documented Identity and Access Management (IAM) frameworks for enterprise-level systems, reducing access-control gaps across 3 simulated business units.
- Designed automated HR-driven User Lifecycle (JML) pipelines and context-aware Multi-Factor Authentication (MFA) to enforce Zero Trust architecture.
- Collaborated with a Cybersecurity Consulting team to align security policies with business objectives, delivering technical presentations to cross-functional stakeholders.

Data Analytics Intern

Deloitte

Dec 2025 - Feb 2026

- Conducted forensic data investigations on large-scale datasets, identifying anomalies, compliance risks, and behavioral patterns across complex multi-source records.
- Engineered dynamic Tableau dashboards that translated raw forensic findings into high-impact visual narratives, enabling faster stakeholder decision-making.
- Leveraged Advanced Excel to classify, clean, and synthesize datasets, producing data-driven recommendations that directly informed risk mitigation strategies.

Gen AI Data Analytics Job Simulation

Tata Group

Nov 2025 - Feb 2026

- Conducted exploratory data analysis (EDA) to evaluate customer delinquency risk and structured insights for predictive modeling within financial services.
- Designed an AI-driven collections strategy leveraging agentic AI automation, incorporating ethical AI principles, regulatory compliance, and scalable implementation frameworks.

Software Engineering Virtual Internship

JPMorgan Chase

Completed

- Completed software engineering simulations focusing on backend development, API integration, and data handling in a financial tech environment.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science

2026 - 2030

IILM University, Greater Noida

Focus on Data Science, Artificial Intelligence, and Software Engineering.

Senior Secondary (12th)

CBSE

GPA: 7.4 / 10

2024 - 2025

Secondary (10th)

CBSE

GPA: 7.8 / 10

2022 - 2023
